SUPERIOR QUALITY

XCAL TOOLS takes pride in manufacturing and selling a full line of road planing, soil stabilization, reclaiming, grading, trenching and foundation drilling bits and carbide tooling products that are American-made. Our inhouse operations gives us the flexibility to quickly test and adapt to changing environments and customer needs. Our cost effective production methods, allows us to provide an exceptional product of the highest quality.

SERVICE AND INNOVATION

For over 20 years, our carbide producer XCAL INDUSTRIES, has been producing high quality carbide for the mining, roof drilling, snow and ice removal, road planing, wear products and metal cutting blanks, producing over fifty grades of cemented carbide and the capability to develop extra coarse, tougher grades to meet the demands of the industry.

These affiliates of Jennmar, in collaboration with each other, can provide you with superior quality products and unmatched customer service. Our commitment to the customer is guided by three words; SAFETY, SERVICE, and INNOVATION. It's these words that form the foundation of our business. It's who we are.

TAMCO TOOLS

Boom Mounted Demo Steel	25
-------------------------------	----

Carbide Tips

We are an ISO 9001 certified facility that offers a wide range of carbide tips to match the various challenges that you might face. Producing over fifty grades of cemented carbide and the ability to create new ones, we can find a carbide grade to meet your needs. Our versatility helps us to check and respond easily to evolving conditions and customer needs. All of our tips provide superb penetration and maximum productivity - regardless of whether you work in soft, medium-hard or extremely hard and demanding conditions.

Retainers Selection

Our retainer selection keeps tool changes quick and reduces your downtime.

Proudly made in the U.S.A.

The Hybrid Difference

XCAL TOOLS hybrid design gives you a blend of the efficient cutting characteristics of our CAP designs, combined with the durability and long life of a plug tip. Our design provides excellent penetration while retaining maximum strength, shear resistance and durability in challenging conditions, improves safety, efficiency and working conditions—leading to increased performance, productivity and lowered production costs.

Cap Carbide Tips

For superior penetration, the larger carbide shoulder provides excellent protection against steel wash.

Insert Carbide Tips

For high-impact conditions, or working with hard materials where steel wash is not an issue.

The Hybrid Carbide Tip

The tapered bottom design provides more strength where it's needed most, helping to prevent carbide fracture.

Cap Carbide Tips

Valve seat carbide tips are preferred over flat bottom tips providing a stronger bond between the carbide and steel giving more stability and support in highly abrasive conditions.

Insert Carbide Tips

Insert carbide tips are best for penetration applications where steel wash is not an issue. These tips provide a strong bond between carbide and steel giving more stability and support proving ideal for use in hard, high-impact conditions.

Hybrid Carbide Tips

Hybrid tips were developed for all cutting requirements—no matter how tough. You won't need to switch tools when your conditions change.

Wide-Top Carbide Tips

Wide-Top tip combines the abrasive resistance of a cap tip with the impact resistance of a plug tip to maximize strength and steel support for ultimate durability in the most challenging conditions.

Proudly made in the U.S.A.

Trenching 18MM & 19MM

Features:

- Standard body design
- Used for small Chain Trenchers and Rock Wheels
- Puller groove for easy tool removal
- Interchangeable series offers flexibly
